Information Page

Kartnite Versus Rating (KVR)

- Inspired by the Chess ELO rating scale and the MKWii VR system.
- The KVR number represents a probability that a player will beat another given player in a race.
- The probability player A beats player B is defined by: $0.5 + (0.5 * (1 - e^{(-1/2500)*(Player A KVR - Player B KVR)}))$
- This is approximately a 10 percent change every 500 points.
- As a reference point the COMs are at 5000 KVR with a small variance every given race (+/- 250 points)
- To calculate the KVR change after a race, a player's expected placement is calculated using their KVR compared to each other player
- Then if a player gets a placement higher than expected, KVR will go up by the difference (times a scale factor of 20) and vice versa if they do worse than the expected placement.

Track MVP

- Track MVP determines who is the best player on each track either seasonally or all-time
- For Seasonal: It is determined by $(0.96)*(Player Track Average) + 0.04(Total Track Points)$
- For All-Time: It is strictly determined by Player Track Average, however there is a minimum race count of 5
- The reason it is calculated slightly differently is to ensure fairness in both the short term and long term
- For Seasonal: It would be unfair if one player went 1/1 and another went 14/15, as due to sample size, the 14/15 result is much better, thus having a small percentage of total score count solves this problem
- For Seasonal: A race minimum would not work as well here due to the asymmetry of race count among players and tracks in a short time frame
- For All-Time: Having a race minimum accomplishes this due to it being long term with a large sample size

Kart Score

- Kart Score is a seasonal stat which takes into account six different categories
- The categories are: GP Wins, Track MVP Points, Race Points, Track Average Points, Shock Dodge Points, and Blue Shell Points
- These are the points given out as it currently stands:
 - Each GP Point Scored: 1
 - Each GP Win: 100
 - Each Time A Track you are MVP of is Played: 0.5 Points Per Player
 - Each Shock Dodge: 5
 - Each Blue Shell: 0.5
 - Each Blue Dodge: 10
 - Average Score: 1 Point Per Average
- There is also Normalized Kart Score for the All Time Stats
- This is calculated by having your seasonal kart score converted into a percentage of the total kart score earned this current season
- Then this is added to the previous seasonal scores decremented by 15 percent for each season that has passed.
- For example if it was season 4 the normalized kart score would be: $This Season's Score + 0.85(Last Season) + .7225(2 Seasons Ago) + 0.61(3 Seasons Ago)$

Kart Rating

- A stat inspired by QBR from football
- A maximum Kart Rating is 160 points
- Up to 60 points are given from GP Win Percentage
- Up to 60 Points are given from average placement
- Up to 40 Points are given from Track MVPs
- It is calculated by: $60(GP Win percentage) + 60(avg/15) + Track MVPs$

Miscellaneous Points

- Misc points is a stat whose goal is to keep track of the little things that happen each race
- It takes into account Blue Shells, Blue Dodges, and Shock Dodges
- It is calculated by:
 - Each Blue Shell: 1
 - Each Blue Shell Dodge: 10
 - Each Shock Dodge: 4
 - Then this sum is divided by the GPs played so it acts as an average per GP

Seeding Power Points

- The goal of this stat is to combine Kart Score, Kart Rating, and Misc Points into a singular metric.
- The idea being that each of these individual stats have their flaws, but by combining them, they cover the flaws of one another
- Seeding Power Points is calculated by looking at a player's location on the leaderboard for each of these stats and summing them up
- 4 Points are given for each position on the Kart Rating Leaderboard
- 3 Points are given for each position on the Normalized Kart Score Leaderboard
- 1 Point is given for each position on the Misc Score Leaderboard
- Currently there are 11 players in the stats
- Therefore the maximum SPP would be $4*11 + 3*11 + 11 = 88$
